REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The closest prior art was found to be Skee (US 6,465,403), Hada et al (US 5,911,836), and Abe et al (US 6,323,169).
3. The applicant has narrowed instant claim 26 to the transitional phrase "consisting of." The applicant's amendments have also required the inclusion of a water soluble solvent.
4. Skee teaches compositions containing metal ion-free bases including tetramethylammonium hydroxide. Skee further teaches the inclusion of solvents and peroxides (see claims 1, 10, and 14). Skee however requires additional ingredients such as chelating agents which are specifically excluded by the instant claims.
5. Hada teaches washing compositions containing water soluble solvents such as TMAH. Hada teaches rinse solutions containing hydrogen peroxide. Hada however fails to teach these two composition in combination.
6. Abe teaches compositions containing hydrogen peroxide, chelating agents, ammonium fluoride and organic solvents. Abe requires the inclusion of the chelating agents as defined in claim 1. As the applicant's instant claims exclude the inclusion of chelating agents, Abe fail to either anticipate or render obvious the applicant's instant claims.

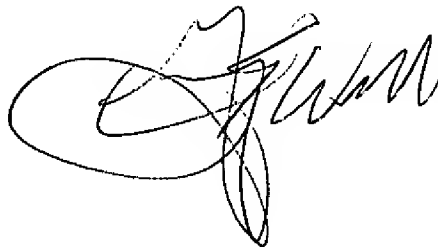

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
